■ **Aircel Picks Tech Mahindra for IoT Services in India**

NEW DELHI Aircel on Thursday said it has partnered with Tech Mahindra to roll out a comprehensive set of Internet-of-Things (IoT) service offerings. Tech Mahindra will provide the IoT services in association with Aeris Communications, a statement said. IoT is described as a network of inter-connected devices that can be accessed through the Internet. For instance, with IoT, street lights will automatically go off when they sense no traffic on the roads and consequently, save power. Another application could be a smart band that will automatically alert a physician when body vitals go to abnormal levels.
